

## Advanced Joint Injection training

Viatrex offers 3 modules of a 3-day weekend each. (24 hrs/module, 72 hrs in all).

For BC ND's: Module 1 satisfies the CNPBC training requirements for Part A, Modules 2 satisfies CNPBC requirements for Part B, Module 3 is more advanced ganglion and tougher injection sites.

**Module 1 - Hand, wrist, elbow, shoulder, foot, knee, ankle, hip, thigh**  
**September 11-13, 2020**

**Module 2 - Sacrum, pelvis, lumbar, thoracic, torso, intercostals, cervical, head & neck**  
**April 3-5, 2020 & December 5-6, 2020**

The course covers training in **Prolo, Neural, Peri-Neural, Prolozone, PRP & others**. No experience in these techniques is required, we teach you. Rights to inject by your board, is a requirement. You need to take the course in succession, need module 1 before doing module 2.

Training includes:

- 4:1 student to practitioner ratio with seasoned & industry leading instructors
- Live models. Lots of hands-on training
- Breakfast, lunch and snacks

This program is designed to offer the richest teaching experience with industry leaders lending their wisdom. Instruction will include both lecture and significant hands-on. Anatomy is a big component for this course, the **Essential Anatomy** app by 3D4Medical will be used as a reference. To get the most out of the program, please ensure you are up to speed on your anatomy. The "**Advanced Inj course Daily program per anatomical segment**" outline describes what we will be covering; **you need to know this anatomy**.

Surrogates/live models are welcome and encouraged, you will need to confirm and coordinate with Viatrex prior to acceptance. Acceptance of a surrogate does not imply they will be used, or that they will be worked on by you or the instructor.

The course is intended to develop a physician's expertise in:

- in-depth knowledge of regional anatomy
  - musculoskeletal – muscle, tendon, ligament, bony landmarks
  - major and superficial nerves, important plexi and ganglia
  - local vasculature
- Orthopaedic and clinical assessment skills
- Treatment decision making guidelines
- Familiarity, skill & safe practice of important therapeutic/regenerative injection techniques.
  - Neural Therapy – superficial and deep
  - Prolotherapy
  - Perineural Therapy
  - Prolozone
  - PRP
- Injectable medicinals including procaine, dextrose, metabolic factors, homeopathics, ozone

A mentorship program is available for those who would like extra clinical support.

Due to the nature of the course, the following items will be required:

- Completed Health questionnaire
- Informed consent form
- Limited liability waiver

Some of the instructors, in alpha order, but not limited to:  
Dr Richard Hull (Past President AOAPRM) & others.
